1. B. PACEMAKERS, IMPLANTS, AND PROSTHESES

Pacemakers, radioactive, silicon or other implants, mechanical devices or prostheses may create a hazardous condition when placed in the cremation chamber and subjected to heat. As Authorizing Agent, I have listed in Section 1.B. on the reverse side all devices (including mechanical, prosthetic, implants, or materials), which may have been implanted in or attached to the Decedent.

3. A. CASKET OR ALTERNATIVE CONTAINER

The remains are to be cremated in a combustible casket or alternative container that is capable of being completely closed, is resistant to leakage or spillage, is sufficiently rigid to be handled easily, and provides protection for the health and safety of Crematory and Funeral Home personnel. The Crematory is authorized to inspect the casket or alternative container, including opening it if necessary. In the event that the casket or container does not meet the above requirements, the Crematory will notify the Authorizing Agent. Many caskets that are comprised primarily of combustible material also contain some exterior parts (decorative handles or rails) that are not combustible and that may cause damage to the cremation equipment. As Authorizing Agent, I authorize the Crematory, in its discretion, to remove and discard the non-combustible materials. I understand that some crematories will not accept metal or fiberglass caskets. I further understand that the casket or alternative container will be consumed as part of the cremation process.

3. B. URN OR TEMPORARY CONTAINER

After the cremated remains have been processed, they will be placed in the urn listed on reverse side or, if an urn is not provided to the Crematory, in a temporary container provided by the Crematory. The Authorizing Agent acknowledges that it is impossible to recover all of the dust and residue from the cremation and processing. However, 100% of the cremated remains recovered from the cremation chamber and processing equipment shall be prepared for disposition in the manner directed per the written instructions of the Authorizing Agent.

In the case of an adult, it is recommended that the urn or temporary container be a minimum size of 200 cubic inches. In the event the urn or temporary container is insufficient to accommodate all of the cremated remains, the excess will be placed by the Crematory in a secondary container. This secondary container will be kept with the urn or the temporary container and handled according to the final disposition instruction set forth in Section 6; provided, however, that the secondary container may not be designed for shipping. All urns or containers provided to the Funeral Home or Crematory must be appropriate for shipping. The Authorizing Agent directs the Crematory to use the specified urn or container listed in Section 3.B. on the reverse side.

(NOTE: No matter what the State specific requirements list, it is the suggested practice to have ALL members of a class sign, even if only one or a majority is required.)

5. B. THE CREMATION PROCESS

The cremation of the Decedent's remains may take place before or after ceremonies to memorialize the Decedent. Cremation is performed to prepare the remains of the Decedent for final disposition. It is carried out by placing the Decedent's remains in the casket or alternative container, which is then placed into a cremation chamber or retort where they are subjected to intense heat and flame. All cremations are performed individually unless noted otherwise in Section 4.A. During the cremation process, it may be necessary to open the cremation chamber and reposition the remains of the Decedent in order to facilitate a complete and thorough cremation. Through the use of suitable fuel, the incineration of the container and its contents is accomplished and all substances are consumed or driven off, except bone fragments (calcium compounds) and metal (including dental gold and silver and other non-human materials) as the temperature is not sufficient to consume them.

Due to the nature of the cremation process, any personal possessions, or valuable materials, such as dental gold or jewelry (as well as any body prostheses or dental bridgework) that are left with the remains and not removed from the casket or container prior to cremation may be destroyed or if not destroyed, will be disposed of by the Crematory. The Authorizing Agent understands that arrangements must be made with the Funeral Home to remove any such possessions or valuables prior to the time that the remains of the Decedent are transported to the Crematory.

Following a cooling period, the cremated remains, which will normally weigh several pounds in the case of an average-size adult, shall be recovered by manual means, such as brushing, and industry-specific mechanical means, such as vacuuming, in order to retrieve the cremated remains from the cremation chamber. Although the Crematory will take reasonable efforts to remove all of the cremated remains from the cremation chamber, some dust and other residue from the process will be left behind. In addition, while every effort will be made to avoid commingling, inadvertent and incidental commingling of minute particles of cremated remains from the residues of previous cremations is possible. The Authorizing Agent understands and accepts this fact.

After the cremated remains are removed from the cremation chamber, all non-combustible material (insofar as possible) such as hinges, latches, and nails from the container will be separated and removed from the human bone fragments by visible or magnetic selection. Other non-bone fragment foreign material that was part of the deceased prior to cremation and recovered with the cremated remains, such as an internal prosthesis, shall be removed prior to processing so that only human bone fragments will remain. Non-bone fragment foreign material may be commingled with other like material and shall be disposed of in a dignified manner, such as burial in a cemetery, in accordance with all applicable laws. The Crematory is authorized to dispose of these materials with similar materials from other cremations in a non-recoverable manner,.

When the cremated remains are removed from the cremation chamber, the skeletal remains often will contain recognizable bone fragments. Unless otherwise specified, after the bone fragments have been separated from the other material, they will be mechanically processed, pulverized. The process of crushing or grinding may cause incidental commingling of the remains with the residue from the processing of previously cremated remains. These granulated particles of unidentifiable dimensions, which are virtually unrecognizable as human remains, will then be placed into a designated container.

6. FINAL DISPOSITION

Cremated remains shall only be released, delivered, mailed or disposed of by the Cemetery or Funeral Home in a dignified manner, in accordance with the law, and with the express written consent of the Authorizing Agent.

6. FINAL DISPOSITION

Following the cremation, the Authorizing Agent directs the Crematory and/or Funeral Home to undertake the actions set forth on the reverse side to arrange the final disposition of the cremated remains of the Decedent. Cremated remains shall only be released, delivered, mailed or disposed of by the Cemetery or Funeral Home in a dignified manner, in accordance with the law, and with expressed written consent of the Authorizing Agent. If the cremated remains are shipped at any time, the Authorizing Agent directs that the Crematory or Funeral Home utilize registered U.S. mail with a return receipt or a shipping service that uses an internal system for tracing the location of the cremated remains during shipment and requires a signed receipt of the person taking delivery of the cremated remains.

The Authorizing Agent understands that if no arrangements for the final disposition, release or shipment of the cremated remains are made in this Authorization, the Crematory shall hold the cremated remains for thirty (30) days after cremation. If during that thirty (30) day period the cremated remains are not retrieved by the person designated above to receive them or by the Authorizing Agent, or if arrangements for their final disposition are not made, then the Crematory will return the cremated remains to the Funeral Home or the Authorizing Agent at the address listed in Section 6.

In the alternative, if no arrangements for the final disposition of the cremated remains have been made within sixty (60) days after the cremation and if the Authorizing Agent has not taken delivery of or caused the delivery of the cremated remains, or in the event the arrangements of the final disposition have not been carried out within the sixty (60) day period because of the inaction of a party other than the Crematory or Funeral Home, then the Funeral Home may dispose of the cremated remains in a grave, crypt or niche. The Authorizing Agent shall be liable for the cost of such final disposition in a grave, crypt or niche and shall reimburse the Funeral Home immediately upon receipt of an invoice.
